Plasmacluster Ion Generator

IG-A10UW/R

High Density Plasmacluster Ion Generator for Home Use

Recommended for Spaces Up to 108 Sq. Ft.

Small indoor spaces such as bedrooms, workout areas and home offices can be home to some of the most challenging areas to control odors from such sources as pets, sweat, smoke and diapers. Conventional filters such as active carbon can only absorb odors from the air and not affect the source. The new Ultra High Density Plasmacluster Ion Generator for home use works with quiet consistency to not only help remove these odors and pollutants from the air, but also to inactivate the odors at the source that get trapped in fabrics, creating a more neutral and fresh smelling environment without harsh chemicals or heavy perfumes. Sharp Plasmacluster Ion Generators can turn trouble spots into inviting spaces in your home.

Features:

Washable Pre-Filter - traps dust, dirt and other airborne particles.

Plasmacluster Technology - splits water molecules into positively and negatively charged ions, which spread throughout the vehicle, surrounding odor particles. This system effectively restores the natural balance of ions in the air, similar to being near a waterfall or just after a thunderstorm. This restored balance helps refresh the air and leaves it cleaner smelling beyond the reach of conventional filters that only affect the air that passes through it.

Simple One-Touch Operation - allows the user choose among 2 fan speeds.

Library Quiet™ - operation is ideal for bedrooms and living rooms. Silent Mode is as quiet as 28 decibels, about the volume of rustling leaves. This allows for continuous use without disturbing normal conversation or music.

Energy Efficient - operation means it's easy on your wallet. With its advanced technologies, it only uses 5.8 watts on low and 14 watts on high.

Long Life Ion Engine - allows for up to 2 years of continuoususe before replacement or a total of up to 19,000 hours without a decrease in performance.

High Density Plasmacluster Ion Generator for Home Use

Specifications

Model Number	**IG-A10UW**
Applicable Floor Space (sq. ft.)	108
Electric (Volts)	120 / 60 Hz
Plasmacluster® Technology	Yes, Ultra High Density (25,000 Ions/cm^3)
Plasmacluster® Ion Modes	On
Filter Type	2- Washable Micro-Fiber Filters
Fan Speeds	2 (High/Low)
Manual Operation	Yes
Purified Air Louvers	Yes, Top of Unit
Control Lights On/Off	No
Library Quiet®	Yes- Only 34 db on low setting
Power Consumption (Watts)	14.0 High / 5.8 Low
Standby Power Consumption (Watts)	.3
Cord Length	6 1/2’
Average Filter Life*	2 Years - Replacement Engine Number: IZ-CA10E
Unit Dimensions (h x w x d) (in inches)	13 1/2” x 5 1/2” x 6 1/4”
Net Weight	5.5 lbs.
Carton Weight	7.7 lbs.
Country of Origin	China
UPC	074000662858
